v.4

MADE AND PRINTED IN GREAT BRITAIN BY
PERCY LUND, HUMPHRIES AND CO. LTD., THE COUNTRY PRESS, BRADFORD

1931

CONTENTS OF VOLUMES

VOL I THE COAL INDUSTRY: ECONOMIC, GENERAL, SAMPLING AND TESTING, TREATMENT, CLEANING, DRYING, BRIQUETTING; THE OIL INDUSTRY: ECONOMIC, GENERAL, COMPOSITION, CLASSIFICATION, PREPARATION, STORAGE AND HANDLING OF LIQUID FUELS

VOL II COMPOSITION, CLASSIFICATION, PREPARATION, STORAGE AND HANDLING OF GASEOUS FUELS AND THE PRODUCTS OF THE CARBONISATION INDUSTRY; UTILISATION OF FUELS FOR STEAM GENERATION AND THE PRODUCTION OF ELECTRICITY; UTILISATION OF FUELS, INCLUDING ELECTRICITY, FOR INDUSTRIAL FURNACE WORK

VOL III UTILISATION OF FUELS, INCLUDING ELECTRICITY, FOR DOMESTIC PURPOSES; LOW-TEMPERATURE CARBONISATION; PULVERISED FUEL; INTERNAL COMBUSTION ENGINES; TRANSMISSION OF POWER; WASTE HEAT RECOVERY; PEAT; POWER ALCOHOL; TRAINING OF FUEL TECHNICIANS; ECONOMIC POSSIBILITIES

VOL IV INDEX

68139

A

Subject.	Vol.	Pages.
AALBORG KILN, cement manufacture, Denmark	II.	904-5.
A.B.C. VORTEX SOOT COLLECTOR—		
Application to gas producers	II.	1346.
ABERAMAN, S. Wales	III.	329.
ABERCONWAY, Rt. Hon. LORD	I.	241.
ABERPERGWN, Glam.	III.	329.
ABSORBENTS, use of, in gas testing	II.	289.
ABSORPTION PROCESS, gas manufacture, cost of plant	II.	410.
ACADEMY OF SCIENCE, Leningrad	III.	1362.
ACCIDENTS—		
Legislation for prevention of electric shocks in factories and workshops (G.B.)	III.	239.
ACCOUNTANCY—		
Control of fuel consumption on German Federal Railways	II.	637.
Determination of heat energy balance in furnaces by book-keeping	II.	1076.
Heating processes, cost accountancy in ...	II.	1212.
Household fuel data (Sweden)	III.	137.
Introduction of cost accountancy in German coal industry	III.	1315.
ACETONE—		
Limits of inflammability	II.	169.
ACETONITRILE—		
Vapour tension in coal tar	III.	823.
ACETYLENE AND HIGHER ACETYLENES in cracked oil	I.	812-13.
ACETYLENE FOR WELDING PURPOSES—		
Note on possible competition of gas from low-temp. carbonisation	III.	1011.
ACETYLENE GAS—		
Classification, manufacture, and calorific value	II.	271.
Heat of combustion	II.	144.
Limit of inflammability	II.	169.
Use for welding pipe joints for gas transmission	III.	843.
ACID HYDROLYSIS OF WOODY MATERIAL FOR SUGAR PRODUCTION	III.	1259.
ACID WASHING PROCESS OF OIL REFINING	I.	655 *et seq.*
ACRO AUTOMOBILE ENGINE—		
Design	III.	658-9.
ADAMOVAS, peat field, Latvia	III.	1156.
ADAMS (Oil pumping)	I.	748.
ADAMS, Reactivity of fuels	II.	490.
ADELAIDE, S. Australia	I.	*facing* 767.

ADMINISTRATION—

Alcohol industry in Germany...	III.	1261.
Gas industry (G.B.)—		
Legal position of statutory and non-statutory undertakings	III.	859.
Legislation as to manufacture and distribution and possible lines of change ...	III.	857-61.
Ownership of undertakings	III.	857.
Possibility of grouping the lines of electric supply	III.	861.

Subject.	Vol.	Pages.
ADMINISTRATION—*Contd.*—		
Germany—long distance gas supply scheme for Ruhr	III.	860.
Italy—		
Compulsory federation of fuel users	III.	1318.
Government mineral rights	I.	194.
Japan—Domestic heating, electric	III.	120.
Latvia—Peat industry	III.	1159.
Russian Government control—		
Allotting of forest areas for private enterprise in firewood production	III.	1355.
Fuel control and distribution	III.	1353 *et seq.*
Peat industry	III.	1166, 1170
Power production and engineering	III.	1350.
ADRIATIC CONFERENCE	II.	451.
ADVERTISING AND PUBLICITY—		
Czechoslovakia—domestic stoves and fuel utilisation	III.	47.
Germany—coal conservation	III.	1299.
Great Britain—electricity propaganda	II.	1037.
Questionnaires: coal v. coke for domestic purposes	III.	251-4.
Japanese electricity campaigns—		
Domestic heating	III.	120.
Porcelain trade, electricity for	II.	1082.
New Zealand—electricity	III.	249, 253
Sweden—home electrification	III.	138.
United States of America—		
Coke	II.	332.
Dopes for improving gasoline	III.	783.
Oil for domestic purposes	II.	344-5.
Use of domestic gas stove	II.	1292.
Vienna—gas supply	III.	25.
ADVISORY COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH, G.B.	III.	1309.
AERIAL ROPEWAY—Coal	I.	510.
AERO PULVERISED COAL PLANT—Use in Japan	III.	388.
AERO UNIT SYSTEM—Firing pulverised coal.	III.	380.
AEROGAN GAS—		
Classification, manufacture, and calorific value	II.	270.
AERONAUTICS AND AIR TRANSPORT—		
Aluminium, extensive use of	II.	1201.
Dirigibles—		
Hydrogen utilisation for inflation of	II.	895.
Duralumin "all-metal" airplanes	II.	1201.
Fuels—		
Analyses, calorific values, and properties required	I.	585
	III.	616, 620, 621.
Benzol-gasoline mixtures	III.	611.
Chemical properties required	III.	615.
Compression ratios	III.	611.
Evaporation losses	III.	616.
"Ignition value"	III.	618.
Specific gravity	III.	615.
Testing under low temperatures	III.	618-9, 782.
Gasoline reserves, national importance of	I.	766.
Heavy oil engines—conditions required, and difficulties	III.	588.

Subject.	*Vol.*	*Pages.*
AERONAUTICS AND AIR TRANSPORT—*Contd.*—		
Research—Germany, fuel tests	III.	618.
Russia—engine design	III.	625, 1362.
AFRICA (See also separate headings for EGYPT, GOLD COAST, NATAL, NIGERIA, RHODESIA, SOUTH AFRICA, Etc.).		
Coal and lignite resources and reserves ...	I.	783.
Coal output	I.	784.
Fuel supply, conditions of	II.	993.
Output of Portland cement (1926)	II.	899.
Use of Diesel engines on Tunis Railways ...	III.	780.
AGLYCONE, definition of	III.	1111.
AGNES LIGNITE (Czechoslovakia)—		
Characteristics of	I.	67.
AGOCHI coal, Korea	I.	128.
AGRICULTURAL COUNCIL, Czechoslovakia—		
Results of experiments with powdered lignite as a plant fertiliser	I.	89 *et seq.*
AGRICULTURE AND FARMING—		
Alcohol production as an auxiliary to agricultural industry	III.	1261.
Austrian coal consumption for agriculture ...	I.	38.
California—application of electric power to irrigation	III.	210.
Coal as a fertiliser, use of	I.	80 *et seq.*
Effect of fertilisation by lignite	I.	86.
Japan—		
Kerosene consumption as fuel for machinery	I.	556.
Value of agricultural waste for fuel consumption	II.	1099.
Latvian Ministry of Agriculture—control of peatfields	III.	1159.
Nutrition of plants	I.	84.
Ploughs—Diesel engine application	III.	661.
Pumping (irrigation), electric power for ...	III.	210.
Soil—		
Effect of organic constituents on plant growth	I.	81.
New conception of humic compounds ...	I.	80.
Replacement by lignite (as fertiliser) ...	I.	81 *et seq.*
Variation of temperature...	I.	82-4.
United States of America—		
Department of Agriculture	III.	171.
Index price for farm produce (1913-27)	I.	542.
AICHI, prefecture, Japan	II.	1083.
AIR (See also *DRYING*)—		
Coal burning, weight of air required for ...	II.	890.
Coal drying	I.	385 *et seq.*
Effect of primary air on combustion (pulverised coal application)	III.	463.
Peat drying, application to	III.	1246-7.
Pneumatic coal cleaning plant	I.	417.
Regulation in boilers	II.	603-8.
Resistance to falling bodies—theory and experiments	I.	387.
Theoretical requirements (and excess necessary) for combustion of natural gas in boilers	II.	711.

Subject.	Vol.	Pages.
AIR (see also *DRYING*)—*Contd.*—		
Velocity of circulation	II.	1152.
AIR COMPRESSORS—		
Output per minute	II.	994.
AIR-CURRENTS—		
Application to coal drying; comparison with water power	I.	385 *et seq.*
AIR DEHYDRATION (see under *FURNACES*).		
AIR GAS (see *PRODUCER GAS*).		
AIR HEATER (PLENUM SYSTEM) (*illus.*)	II.	1044.
AIR HEATERS—Electric heating note	II.	1321.
AIR POLLUTION (see also *SMOKE AND SMOKE ABATEMENT*)—		
Discussion	III.	237-55.
Exhaust gases from Diesel engines running on gas oils—necessity for complete combustion	I.	592.
Toxicity of low-burning liquid fuels, causes of	I.	592-3.
AIR PRE-HEATERS FOR BOILER PLANT—		
Efficiency promoted by	II.	973.
Recuperators	III.	885.
AIR PRE-HEATING—		
Effect on carburation in i.c. engines	III.	744.
AIR RESEARCH INSTITUTE, Germany	III.	618.
AIR TRANSPORTERS—		
Pulverised coal—design operation, and power consumption	III.	493.
AIZPUTES, district, Latvia—Peat field area	III.	1149.
AJIKAWA POWER STATION, Osaka, Japan	III.	387.
AKAIKE POWER STATION, Japan	III.	396.
AKAN, Mt., Japan	I.	545.
AKITA, prefecture, Japan	I.	545.
Oilfield	I.	550.
ALABAMA, State, U.S.A.	I.	323.
ALBERTA, PROVINCE OF, Canada—		
Bitumen—		
Cracking practice, products and yields; properties and temp. analysis	I.	804.
Bituminous sands—		
Availability and potentialities as source of fuel oil; characteristics and constitution	I.	581-3, 803.
Oil recovery from	I.	582-3.
Potential products	I.	803.
Research	I.	582.
Resources	I.	803.
Separation of bitumen—practice	I.	803.
Coal—		
Analyses and calorific values	I.	57, 60.
Carbonisation practice and results	II.	15, 21.
Classification	I.	56.
Composition	I.	55.
Moisture content, geographical distribution of	I.	57.
Resources	I.	55.
,,	II.	7.
Low-temperature carbonisation possibilities	III.	1117-18.
Oil production	II.	8.
From bituminous sands	I.	583.

Subject.	*Vol.*	*Pages.*
ALBERTA, PROVINCE OF, Canada—*Contd.*—		
Research organisation note	III.	1320.
Scientific and Industrial Research Council	I.	54, 581-3.
ALCOHOL—		
Advantages as fuel	III.	1255 *et seq.*
Aero engines, as fuel for	I.	585.
As by-product of coke-ovens—		
Gas industry	III.	1269.
Pulp industry	III.	725.
Bibliography	III.	1270.
British Empire—production for power purposes in Dominions, Colonies, etc. ...	III.	1261.
Commercial possibilities as motor-fuel in tropical countries	III.	1258.
Comparison with gasoline—calorific value and thermal efficiency	III.	1257.
Composition of "power alcohol"	III.	1256.
Cost of manufacture	III.	1260.
Definition of "power alcohol"	III.	1256.
Denaturing with crotonaldehyde	III.	725.
Development of German industry, and post-war position	III.	1261.
Discussion—"Power alcohol"	III.	1272-4.
Ethyl alcohol production—historical ...	III.	1273.
Evaporation of alcohol-water mixtures ...	III.	734.
Evaporation of benzene-water-alcohol mixtures	III.	736.
Evaporation of gasoline-water-alcohol mixtures	III.	737.
French industry	III.	1261.
Fuel mixtures	I.	593.
,, ,, ...	II.	895.
,, ,, ...	III.	696.
Fuels containing alcohol (British)	III.	1257.
Foreign fuels	III.	1256.
Gasoline, comparisons with (as motor fuel)...	III.	726, 1257.
Hydrogen combination with carbon-monoxide gas for production of alcohol, note on ...	II.	895.
Internal combustion engines, as fuel for ...	III.	1257.
International Air Congress	III.	724, 726.
Isopropyl alcohol—use as solvent in various arts (U.S.A.)	III.	1273.
Manufacture of "Natalite"	III.	1264.
Methods of production	III.	1259.
Molasses as source of—developments in Australia, British Africa, British Guiana, Mauritius, and West Indies	III.	1263.
Motor fuel, alcohol as	I.	600.
,, ,, ,, ,, ...	III.,	724 *et seq.*
Historical	III.	724.
Research (G.B.)	III.	1258.
Various countries	III.	724.
Possible recovery from unsaturated hydrocarbons (gas from low-temp. carbonisation)	III.	1011.
Production from—		
Carbide	III.	1269.
Cassava	III.	1263.
Cove-ovens, as by-product	III.	1269.
Ethylene	III.	1268.

Subject.	Vol.	Pages.
ALCOHOL—*Contd.*—		
Production from—*Contd.*—		
Flax residue	III.	1266, 1274.
Gas industry, as by-product	III.	1269.
Grasses, various	III.	1265-6.
Jerusalem artichokes	III.	1259.
Maize	III.	1263.
Mangolds	III.	1259.
Molasses	III.	1263.
Nipah palm	III.	1264.
Potatoes	I.	600.
,,	III.,	1259.
Straw	III.	1265-6.
Sugar beet	III.	1259.
Sulphite lyes	III.	725, 1268.
Sweet potatoes	III.	1264-5.
Synthetic methods	I.	600.
,, ,,	III.	1268-9.
Wood, sawdust, etc.	I.	600.
,, ,,	III	725, 1267.
Research	III.	724, 1258.
Resources and reserves (British Empire)	III.	1258 *et seq.*
Sarina, Queensland—plant for manufacture from molasses	III.	1263.
Stability to high compression of alcoholic fuels —influence on internal combustion engine design	I.	589.
Sweden—production from wood	III.	725.
Synthetic alcohol	III.	1273.
Tests on internal combustion engines	III.	726 *et seq.*
Uganda, Africa—plant for manufacture from molasses	III.	1263.
United States of America development—*Discussion*	III.	1273-4.
Vapour pressure—comparison with gasoline	III.	726.
Yield of various grasses, straws, and waste vegetable materials	III.	1266.
ALEXANDER MINE, Duchcov, Czechoslovakia.	I.	74.
ALEXANDRIA, Egypt	I.	*facing* 767.
ALIPHATIC FUELS—		
Suitability for high-speed Diesel engines	I.	589-90.
ALKALINE HYPOCHLORITE TREATMENT OF OIL REFINING	I.	654-5.
ALL-POLISH COAL CONVENTION—		
Division of coalfields	II.	718.
"ALL UNION ASSOCIATION OF ENGINEERS," Russia	III.	1364.
ALLAN, Dr. J. A. (*Coal supply in Alberta*)	I.	55.
ALLEGHANY, Region, U.S.A.	II.	336.
ALLEGHENY STEAM HEATING CO., U.S.A.	III.	349.
ALLEMAND, D.: Storage, handling and transport of Ombilin coal at Emmahaven (Sumatra)	I.	479 *et seq.*
ALLEN (*Central heating radiator tests*)	III.	95.
ALLEN, EDGAR (Ruggles-Coles coal Dryer)	I.	355.
ALLEN, EDGAR, & CO. (Publishers)	III.	1009.
ALLGEMEINE-ÖSTERREICHISCHE ELECTRIC WORKS, Austria	II.	569.
ALLGEMEINE VERGASUNGS GESEL., Germany—		
Low-temperature carbonisation plant (lignite), description of	III.	1041 *et seq.*

Subject.	Vol.	Pages.
ALLGEMEINE VERGASUNGS GESEL., Germany—*Contd.*—		
Briquetting	III.	1052,
ALLMAND, A. J. (Electric furnaces)	II.	1076.
ALPINE MONTAN GESEL., Styria (Largest coal mining Co. in Austria)	I.	40, 329.
ALPS, THE	III.	868.
ALSATIAN ASSOCIATION DES PROPRIETAIRES D'APPAREILS A VAPEUR, France	III.	1306.
ALTENBURG, Germany	III.	1057.
ALTONA, Victoria, Australia—		
Lignite deposits, notes on	I.	2, 254-5.
ALUM SHALE (See under *OIL SHALE*)		
ALUMINIUM APPLICATIONS, AND TREATMENT—		
Aeroplane manufacture	II.	1201.
Aluminium carbonising retort, success of (Germany)	II.	490.
Anhydrous aluminium—use for oil refining...	I.	663.
Domestic utensils (Japan)	III.	126.
(United States of America)	II.	1201.
Electric heating, advantages of	II.	1371.
Electric organs	II.	1201.
Motor-car manufacture, increasing use in ...	II.	1200.
Phonograph manufacture	II.	1202.
Player-pianos	II.	1202.
Smelting, electrical	II.	849.
Soldering, electrical	II.	839.
AMAGASAKI POWER STATION, Japan		
Description and operation of pulverised coal plant, tests and results	III.	391-4.
AMARILLO, Texas	I.	772, 776.
AMERICA, SOUTH (See *AMERICAN CONTINENT and separate countries*).		
AMERICAN AERO PULVERISER—		
Use in Japan	III.	385, 389.
AMERICAN BLOWER CO., Detroit	III.	915.
AMERICAN BOTTLE CO., Newark, Ohio, U.S.A.	II.	1346.
AMERICAN CHEMICAL SOCIETY	III.	1322.
AMERICAN COAL CO.	I.	316.
AMERICAN COAL CLEANING CORP., Welch, W. Va., U.S.A.	I.	316.
AMERICAN CONTINENT (See also *UNITED STATES OF AMERICA, CANADA, ARGENTINE REPUBLIC* and other geographical Headings)		
Cement output (1926)	II.	899.
Coal and lignite resources	I.	55, 783.
Classification (N. America)	I.	55, 221.
Crude oil production and gasoline consumption	I.	*facing* 767.
Natural gas—long distance transmission practice	III.	812.
North America—total consumption of coal, coke, briquettes and lignite	III.	1308.
South America—		
Bituminous coal—resources and reserves.	I.	783.
Note on low heat and high ash contents	III.	538.
Fuel oil, note on	III.	538.
Oil cracking industry, note on	I.	765.
Total consumption of solid fuels ...	III.	1308.
Undeveloped water power resources ...	II.	890.

Subject.	*Vol.*	*Pages.*
AMERICAN "COPPER DISH"—		
Testing corrosive properties in aviation fuels, use for	III.	619.
AMERICAN ELECTROCHEMICAL SOCIETY	II.	892.
AMERICAN ENGINEERING STANDARDS COMMITTEE	I.	221.
AMERICAN GAS ASSOCIATION	II.	387, 1181, 1205, 1213, 1219, 1379.
,, ,, ,, ...	III.	168, 173, 178, 191, 840, 845, 1322.
AMERICAN INSTITUTE OF BAKING ...	II.	1205.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS	II.	1319.
AMERICAN INSTITUTE OF MINING AND METALLURGICAL ENGINEERS ...	I.	307, 763.
,, ,, ,, ,,	II.	412, 1335.
,, ,, ,, ,,	III.	407, 459, 506, 1322.
AMERICAN IRON AND STEEL CO., Lebanon, U.S.A.	III.	407.
AMERICAN IRON AND STEEL INSTITUTE...	II.	1015, 1193, 1353.
AMERICAN KOPPERS WET PURIFIER (Gas)		
Use in Japan	II.	219.
AMERICAN OIL BURNER ASSOCIATION ...	II.	343.
AMERICAN PETROLEUM INSTITUTE ...	II.	344-5.
AMERICAN RADIATOR CO.—		
Foundry plant—core ovens	II.	1317.
AMERICAN RAILWAY FUEL ASSOCIATION	III.	1322.
AMERICAN RHEOLAVEUR CORP.	I.	310, 314-15, 324.
Description of R. dewatering screen ...	I.	348.
,, ,, washer	I.	362, 369, 446.
Costs of	I.	370.
AMERICAN SOCIETY FOR TESTING MATERIALS—Organisation and activities ...	I.	221 *et seq.*
	II.	331.
AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS	II.	1181.
AMERICAN SOCIETY OF MECHANICAL ENGINEERS	II.	594, 596, 768, 1181.
,, ,, ,, ,,	III.	417, 1321-2.
AMERICAN STANDARD CABLE OIL DRILLING SYSTEM—Use in Japan	I.	547-9.
AMERICAN STOVE CO.	II.	1299.
AMMONIA AND COMPOUNDS—		
Coal as source of ammonia	II.	385.
Fertiliser, use as	II.	105.
High explosives, use in manufacture of ...	II.	105.
Liquor, ammonia, treatment of	II.	450 *et seq.*
Products	II.	224.
Recovery (see also under *GAS, MANUFACTURE, etc.*).		
*Anhydrite process (see below)		
Bohemian lignite, from	I.	72-3.
*Calcium sulphate process	II.	457 *et seq.*
Economics of, and cost	II.	462-3.
Factors influencing speed of process	II.	459.
Operation of plant, economics of operations involved, and use of products	II.	458.
Centralisation of	II.	451, 549.
Chemical and technical problems of ...	II.	452.

Subject.	Vol.	Pages.
AMMONIA AND COMPOUNDS—*Contd.*—		
Recovery (see also under *GAS, MANUFACTURE, etc.*)—*Contd.*—		
Coke-ovens, recovery in	II.	326, 418-19, 501, 556, 1147.
,, ,, ...	III.	1410.
Cost	II.	450, 454-5.
Description, discussion, and economics of various processes	II.	450 *et seq.*
Discussion	II.	553-4.
Filtration—design of suction filters (anhydrite process)	II.	462.
Gas manufacture, recovery in—		
Methods	II.	395.
Present position of industry (G.B.)	II.	384, 450.
Strength of ammonia liquor ...	II.	396.
*Gypsum process (see *Calcium process*, above).		
Historical	II.	450.
Japan	II.	1147.
Separation of calcium carbonate and ammonium sulphate	II.	462.
Vienna—gasworks practice	II.	315-16.
Sulphate of ammonia—as fertiliser	III.	1410.
Discussion	II.	562.
Grading	II.	419.
Methods of production in gasworks ...	II.	315, 450 *et seq.*
Production in Japan (1926)	II.	214.
From blast-furnace coke manufacture	II.	1147.
Synthetic ammonia industry, and challenge to gas industry	II.	385, 394, 450.
Billingham-on-Tees undertaking ...	II.	451, 557.
Discussion	II.	556-7, 562.
Italy	III.	1242.
Possible development by gas industry...	II.	384.
AMMONIUM AND AMMONIUM SALTS (see *AMMONIA*).		
AMSTERDAM, Holland	III.	676, 1319.
ANALYSIS (*For particular analyses see COAL and other respective substances*).		
ANCHOR CAP & CLOSURE CO., U.S.A. ...	II.	1210.
ANDREASEN, A. H. M. (*Coal sieving*) ...	III.	290.
ANDREEFF, PROF. S. E. (*Director of The Institute for Mechanical Treatment of Minerals, Leningrad*)	III.	1362.
ANDREW, H. O.: Gas utilisation in the food industry (U.S.A.)	II.	1204-5.
ANDREW, T. (*Heats of combustion*)	II.	144.
ANGLO-AMERICAN OIL CO.	III.	779.
ANGLO-PERSIAN OIL CO.	I.	645.
ANHYDRITE PROCESS (see also *AMMONIA RECOVERY, calcium sulphate process*)—		
Cost per ton of ammonium sulphate manufactured	II.	464-5.
ANHYDROUS ALUMINIUM—		
Use for oil refining	I.	663.
ANICHE coal mines, France	II.	523.
ANILINE, Vapour tension in coal tar	III.	823.
ANILINE POINT OF AVIATION GASOLINE...	III.	615.
ANIMAL OILS—Diesel engines, as fuel for ...	III.	690.
ANJERA SUDJENSK coal, Russia	I.	*facing* 184.

Subject.	Vol.	Pages.
"ANKA," Japanese portable stove—		
Charcoal note	II.	1101.
"ANNALES DES MINES DE BELGIQUE"		
(Periodical)	II.	773.
ANNEALING—Gas applications for (U.S.A.) ...	II.	1199, 1208.
ANNEALING, ELECTRIC HEATING FOR—		
Brass and other non-ferrous metals	II.	1055, 1320.
Steel	II.	1049 *et seq.*
ANTHRA coal mines, France	II.	519 *et seq.*
"ANTHRACINE," manufacture of	II.	533-4.
ANTHRACITE (See under *COAL*).		
"ANTI-KNOCK" (See under *ENGINES, GASOLINE, and GASOLINE*).		
ANTOFOGASTA, Chile	I.	*facing* 767.
ANWANDTER (Rate of ignition of gases)... ...	II.	301.
ANZAN STEEL WORKS (South Manchurian Railway Co. Ltd.)—		
Pulverised coal plant, description and operation of	III.	395-6.
AOMORI, prefecture, Japan	I.	545.
APMANN, A. M.: Heat treatment of non-ferrous metals (U.S.A.)	II.	1199-1203.
APPALACHIAN coalfield, U.S.A.—	I.	224.
,, ,, ,, ...	III.	852.
Characteristics of coal	III.	462, 464.
APPLEYARD, MAJ. K. C.—		
Dry cleaning of coal	I.	416 *et seq.*
Resistance of air to falling bodies	I.	408.

Capital cost of cracking plant	I.	765.
Drilling	I.	535-7.
Production	I.	537.
Research on cracking, U.S.A.	I.	764.
Cracking processes, plant, and products—		
Acetylene and higher acetylenes	I.	813.
Bergius process, description of	I.	710-12.
Bibliography	I.	814-8.
Bitumen, results on	II.	18.
Blümner process (Germany), description of	I.	710-12.
Coke production	I.	778-9.
Relative with gasoline	I.	778.
Coking and cracking by simultaneous process—results	I.	772.
Commercial possibilities of aromatic hydrocarbons, diolefines, and olefines	I.	813.
Conservation of crude oil resources, cracking as aid to	I.	767.
Constituents and composition of oil gases from cracking	I.	782.
Costs	I.	764-5.
Cracking temperature	I.	768.
"Cross" process, description of	I.	699-700.
Japanese plant in use	I.	553.
Description of process	I.	770 *et seq.*
Development—Great Britain	I.	693 *et seq.*
United States	I.	764 *et seq.*
Diagram of cracking plant	I.	*facing* 769.
Diolefines	I.	813.
Discussions	I.	563, 846-50.
Distribution (world) of plant	I.	765.
"Dubbs" process, description of	I.	701-4.
Japanese plant in use	I.	553.
Economic aspect—advantages of simultaneous cracking and coking	I.	770.
European plant, distribution of	I.	765.
Expenditure on research (U.S.A.)	I.	764.

Subject.	Vol.	Pages.
OIL, OIL CRACKING, AND OIL DISTILLATION—*Contd.*—		
Cracking processes, plant, and products—*Contd.*—		
Experiments on fish oil to determine origin of petroleum	I.	808.
Fish oils—practice, products and yields	I.	809.
Flashing system, description of	I.	703.
Flexibility of cracking process	I.	767, 812.
Future research on products	I.	812.
Gas, oil—		
Production, composition, and use	I.	780-2.
Yield per cent. based on charging oil	I.	781.
Gasoline production	I.	764 *et seq.*
German lignite oils—process and results	I.	788.
"Holmes-Manley" process, description of	I.	704-6.
Hydrocarbons, commercial possibilities of	I.	812-3.
Japan—		
Use of "Cross," "Dubbs," and "Jenkins" processes	I.	553-4.
"Jenkins" plant, description of	I.	707-9.
"McAfee" process, use of aluminium chloride in	I.	709.
Note on heavy cost	I.	710.
Non-residium operation	I.	704.
Olefine hydrocarbons in cracked oils	I.	812.
Operating pressures and temperatures	I.	781.
Operation of plant	I.	768 *et seq.*
Palm oil—practice, products and yields	I.	807-8.
Paraffin hydrocarbons in cracked oils	I.	812.
Peat oils	I.	809-12.
Percentage yields from various crude oils	I.	781.
Plant—		
Capacity and efficiency	I.	764.
Capital cost	I.	765.
Distribution of	I.	765.
Value of world installations (approx.)	I.	846.
Possible influence of development of heavy oil engines on oil cracking	III.	587 *et seq.*
Possible sub-products	I.	812.
Pressure distillate bottoms	I.	775.
Pressure distillation and liquid-phase processes	I.	698 *et seq.*
Products	I.	767.
Properties and use of crude gasoline from cracked oil	I.	775.
Research, expenditure on	I.	764.
Residuals of process	I.	775.
Results from simultaneous cracking and coking	I.	772.
Results from various crude oils	I.	700.
Results of residual oil cracking	I.	771.
Specific gravity and calorific values of oil gases from cracking	I.	782.
Synthetic rubber as by-product	I.	813.
Transport, preliminary cracking as aid to	I.	777.
Tube and tank process, description of	I.	709.
United States practice	I.	763 *et seq.*
Refineries equipped for cracking, production, and total capacity	I.	765.

Subject.	Vol.	Pages.
OIL, OIL CRACKING, AND OIL DISTILLATION—*Contd.*—		
Cracking processes, plant, and products—*Contd.*—		
Value (approx.) of world equipment and auxiliaries	I.	765.
Vapour phase process	I.	712-7.
"Gyro" method, description of	I.	713.
"Knox" ,, ,,	I.	715.
"Leamon" ,, ,,	I.	716.
Wood tar—analysis, and cracking practice	I.	806.
Wood tar oil—products and yields and temp. analysis of oils	I.	806.
World wide use, notes on	I.	694, 765.
Yields—percentage of products from various crude oils	I.	781.
Diesel oils (see *FUEL OILS*).		
Distillation—		
Advantages of pipe-still compared with shell-still	I.	624-5.
Canada—results	II.	9.
Chemical reactions involved in the distillation of petroleum	I.	641 *et seq.*
Bibliography	I.	667.
Dephlegmation practice and equipment	I.	620-3.
Control of apparatus	I.	623.
Design and operation of bubble cap towers	I.	621.
Design and operation of modern pipe-still	I.	615 *et seq.*
Developments in	I.	614 *et seq.*
Evaporation practice	I.	620.
Fractionation (*see dephlegmation*, above).		
Furnaces—radiant heat recirculated flue gas type	I.	618.
Japanese practice	I.	552-4.
Liquid refining agents	I.	643-62.
Mercury vapour—use for heating lubricating oil vacuum stills	I.	638-9.
Methods of operating pipe-stills	I.	626 *et seq.*
Pipe-stills—typical plant	I.	616-18.
Relative efficiency of pipe-stills and shell stills	I.	625.
Results of modern distillation	I.	615.
Soda-washing	I.	643-4.
Solid refining agents	I.	663-6.
Temp. analysis of oil distilled from tar	I.	806.
United States practice	I.	627-9.
Vacuum distillation—		
Japanese practice	I.	554.
Schulze process—description	I.	635-8.
Steinschneider process—description	I.	632-5.
Use of mercury vapour for heating stills	I.	638.
Viennese gasworks, distillation plant in	II.	315.
Domestic heating, consumption, etc.—		
Central heating—efficiency and cost	III.	106.
Efficiency of oil-burning plant (U.S.A.)	III.	171-2.
Fuel equivalents for house-heating (oil, coal, and gas)	III.	190.
Japan	III.	119, 122.
Sweden (cooking)	III.	139.

Subject.	Vol.	Pages.
OIL, OIL CRACKING, AND OIL DISTILLATION—*Contd.*—
